VINAY KOTADIYA

Data Analyst | SQL, Excel, Power BI, Python

London, UK (open to relocating anywhere in the UK) | vinaykotadiya49@gmail.com

Portfolio: vinaykotadiya.github.io | linkedin.com/in/vinay-kotadiya | github.com/vinaykotadiya

SUMMARY

MSc Data Science graduate with Distinction (University of Hertfordshire, 2026) who uses SQL, Excel, Power BI and Python to clean data, track KPIs and build dashboards that answer business questions. I explain results in plain language, and 2.5 years as a Housekeeping Supervisor taught me to plan, manage stock and fix problems fast. Looking for a junior or graduate Data Analyst role in the UK.

SKILLS

- **SQL:** joins, GROUP BY, HAVING, subqueries, CTEs, data cleaning, working with large datasets (245,000+ rows)
- **Excel:** PivotTables, XLOOKUP, Power Query (ETL: extract, clean and load data), charts, dashboards
- **Power BI:** data modelling, basic DAX, dashboards and reports; Tableau (basic)
- **Python:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Statsmodels
- **Statistics:** averages and distributions, correlation, hypothesis testing (t-test), regression, time series forecasting
- **Analysis:** data cleaning, data quality checks, EDA, KPI reporting, trend analysis, data visualisation, understanding business requirements, reporting to non-technical stakeholders
- **Tools:** Jupyter Notebook, Git, GitHub, VS Code, AI tools (Claude) for coding and analysis
- **Currently learning:** advanced SQL (window functions), advanced DAX, A/B testing, Snowflake, Looker Studio

PROJECTS

Retail Sales Dashboard – UK Grocery (Simulated Data) | SQL, Excel, Power BI

- Cleaned about 245,000 sales records from 20 stores in SQL, removing duplicates and fixing missing prices.
- Built a Power BI dashboard showing revenue, margin and year-on-year change, from national level down to each store.
- Found weekend sales per visitor were about 15% lower in three regions with fewer staff, checked the gap with a t-test, and suggested a weekend staffing trial.

UK Electric Vehicle Adoption – MSc Dissertation | Python, Pandas, Statsmodels

- Used 5+ years of UK government registration data to study electric vehicle growth by region.
- Built and compared ARIMA, Holt-Winters and LSTM forecasting models, chose the most accurate, and showed results in clear charts.

Customer Churn Analysis – Subscription Business (Simulated Data) | SQL, Python, Tableau

- Found that support tickets, monthly plans and late payments were the main reasons 12,000 customers cancelled.
- Built a Tableau dashboard and suggested three simple actions to keep high-value customers.

EXPERIENCE

Security Officer, Vespasian Security | Oct 2026 – Present

- Cover 12-hour weekend day shifts on the HSU campus, alongside my weekday role.

Security Guard, Fortel Security Services | Sep 2026 – Present

- Control site access, check IDs and keep the Daily Occurrence Book up to date on every shift.
- Make sure staff and visitors follow safety rules on a construction site and in a hotel.

Housekeeping Supervisor, Shoreditch Inn, London | Feb 2024 – Sep 2026

- Managed a team of 3–5 housekeepers, managed stock and made weekly staff rotas for busy and quiet days.
- Worked with front desk and maintenance teams every day to sort out room issues.
- Checked rooms after cleaning and fixed guest complaints quickly.

EDUCATION

MSc Data Science with Advanced Research (Distinction), University of Hertfordshire, UK | 2024 – 2026

- Modules: machine learning, statistical modelling, data analysis, NLP and research methods

Bachelor of Computer Application (BCA), CGPA 8.06/10, Saurashtra University, India | 2021 – 2024

CERTIFICATIONS & ADDITIONAL INFORMATION

Data Analytics Job Simulation, Deloitte (Forage) | 2024

Right to work: Yes, in the UK. No sponsorship needed. Available full-time.
